Tiago Rebelo

AI & Software Engineer

Available to relocate - Lisbon, Portugal

tcctr | tiagocctrebelo

tiagocctrebelo@gmail.com

Summary

Software engineer focused on automation and AI-assisted tooling. My best work has been internal tools that outlive the project and stay in daily use after I hand them off. Constantly learning about new tech and working on projects.

Experience

Feb 2025 - Jul 2026 — **Tech Advisory Analyst (Automation & AI Tooling)**, *Accenture*, Portugal

- Built AI-assisted tools for generating user stories, acceptance criteria, and test cases, cutting a 2-hour task to 2 minutes for a team of 8.
- Reduced a recurring 10-hour weekly Excel process to under 30 minutes with custom Python automation scripts, reclaiming roughly 40 hours a month.
- Implemented automated tests to validate application functionality and catch regressions before release.
- Managed the distribution and resolution of bugs across a team of 4 devs.

Jul 2024 — **Software Developer Summer Intern**, *Accenture*, Portugal

- Implemented Java features for an internal banking application's document upload flow, including parsing file metadata to identify file types.

Relevant Projects

Jul 2026 - Present — **Local AI Stack**, Self-hosted LLM inference

- Run Qwen3.6-35B-A3B as a containerized inference server behind Odysseus, with speculative decoding and context tuning on a single 16GB GPU reaching 66.04 tps with 40K context. Accessible remotely via Tailscale.

Sep 2026 — **Production RAG API**, Retrieval-augmented Q&A service over PostgreSQL docs

- Built a RAG API over the PostgreSQL docs with header-aware chunking, pgvector embeddings, hybrid search with reranking, and LLM answer generation, served via FastAPI with auth, rate limiting and caching.
- Designed an evaluation pipeline and A/B tests to compare retrieval and answer quality. Powered by my local LLM. GitHub Project

Skills

Programming — Python, Java, C, SQL

Others — Claude API, Agentic workflows, MCP servers, AWS, Docker, Pandas, Playwright, Selenium, Postman, Git, CI/CD, pgvector, FastAPI, Embeddings

Education

2021 - 2025 — **BSc**, Computer Science and Engineering, *Instituto Superior Técnico (IST)*

Certifications

AI/Cloud — AWS AI Practitioner, AWS Cloud Practitioner, Claude Certified Architect (CCA-F), Agentic AI (Stanford HAI)

Languages

Portuguese - Native | English - Advanced
